Notes on {Medley}<internal>test>

<test> subdirs:
admin, ARs, env, GC, IO , LANGUAGE, Library, loops, lyric, Maiko, tools

<test>Top level files
README.TEDIT (this file)
TEST-RESULTS (contains log from running AUTO tests from 1988)
DOT.read-me-first (originally .read-me-first)

<test>4045> Deleted

<test>Maiko>
Subdir ARs, AUTO, Aux, HAND, OBSOLETE
Top level files

STACKHAX (has CHECKSTACKSPACE, seems to get tangled up in it's own stack
STACKTAKESHI (seems to cause a stack overflow on opurpose, which leaves stack clean enough that URAID hard-reset recovers from. Suspect timeouts aren't correct
BAD-XREF (no compiled file)
display.cl (says "from Texas Instruments")

<test>Maiko>ARs>
looks like junk:
optests & .dfasl (like AUTO>OPCODES.TEST)
ENDLESSPUSHES
AR-TEST-CASES.Auto-log

<test>Maiko>AUTO>
OPCODES.TEST
OPCODES.DFASL
may need EXPORTS.ALL to compile
most tests succeed
test BITBLT-DIAGONALS and BITBLT-SLOPED-LINES fail
A little hard to debug because the inspector for 2D arrays fail

<test>Maiko>Aux>
Another cop y of **bbtests** and **optests.lisp**

<test>Maiko>HAND>
MAIKO-ARRAY-TESTS and **DFASL** looks like in AUTO

<test>Maiko>OBSOLETE>
Probably incororated into AUTO>
AREF-TESTER
ARRAY-TESTER.TEST
FLOAT-TESTER
MAIKO-UNWIND-TESTS
TESTER (compiled OK)
unwindtest
xclopcodetests

<test>Library>
4045xlpstream> junk
Auto> junk(!)

<test>loops>
LOOPS-SETUP.TEDIT
LOOPS-TESTER-.... files

test>Lyric>
(old-versions of **DO-TEST .dfasl** and **.tedit)**

<test>Tools>
AUTOTEST.TEDIT (originql AUTOTEST.TEDIT-orig)
AUTOTEST & .DFASL framework for running tests

DO-TEST & .DFASL (copied newer version from Medley internal/library)
DO-TEST.TEDIT on Writing Software Tests
(many other files not reviewed yet)
